### New AggieTrain Workshops

...

## Welcome to AggieTrain!

### Excellence in Education and Training.

The **Division of Information Technology (DoIT)** offers a multitude of training classes for the campus community to learn about the services and technologies that are available. We encourage you to use these course offerings in order to expand your skill set, increase your marketability, learn a new discipline or reinforce your existing knowledge.

A knowledgeable trainer, of instructor led classes, will introduce you to the concepts in a clear and straightforward manner. Training sessions may include interactive presentations and demonstrations. Training topics are added routinely, and suggestions are most welcome.

If you have questions, concerns, or special requests or would like to suggest a topic for a workshop, send an email to [atrain@ncat.edu](mailto:atrain@ncat.edu). In addition to our scheduled classes, our trainers are available on a limited basis for a class or faculty/staff group. Faculty or staff may call **336.256.2354** or email us.

### Our Mission...

is to provide support services that promote high quality technical opportunities for the university faculty and staff by:

- **Providing a broad range of administrative computing and computer based training support.**
- **Ensuring that our services meet the needs of the University now and in the future.**
- **Introducing and modifying training program offerings in response to and in anticipation of changing technologies and campus needs.**

We provide the following services:

- **AggieTrain (Element K) Online Training**
- **Blackboard Training**
- **Instructor Led Computer Essentials**
- **Banner Training**
